## WATER FITNESS CLASS DESCRIPTIONS

- ◆ **Aquacise:** This is an intense aerobic aquatic class in the shallow end of the pool. All major muscle groups are utilized. Come and join us to sample what's new and exciting in water fitness.
- ◆ **Aquajog:** This high intensity workout with no impact is held in deep water with flotation belts worn as support. Water resistance helps to tone and strengthen muscles while burning calories. Enjoy the weightlessness of deep water while working out to energizing music. The flotation belts are provided by the YMCA and are required for this class.
- ◆ **Hydrodynamics:** This aquatics fitness class combines lap swimming with interval training for a total body workout. Aided by a background of fast-paced music, participants engage in cardio fitness training, strengthening and varied combinations of swimming strokes to condition and tone musculature. Belts and cropped flippers are required equipment, and kickboards and weights are incorporated for resistance. This class is for the seasoned fitness enthusiast who is comfortable in all depths of water. All equipment is provided by the Y.
- ▲ **Aquacise Lite:** This class is done in a fun, social and supportive environment. Exercises are designed to improve flexibility, freedom of movement, and muscle strength through various range-of-motion and "light" cardiovascular exercises.
